Dow Jones Sustainability World Index (DJSI World)

Objective

The Dow Jones Sustainability World Index (DJSI World) comprises the leading companies in terms of sustainability around the world. It captures the top 10% based on long-term economic, environmental and social criteria out of the biggest 2500 companies worldwide. Components are selected according to a systematic corporate sustainability assessment that identifies the sustainability leaders in each of 58 industry groups. The underlying research methodology accounts for general as well as industry-specific sustainability trends and evaluates corporations based on a variety of criteria including climate change strategies, energy consumption, human resources development, knowledge management, stakeholder relations and corporate governance. While no industry is excluded in the selection process and in the composition of the DJSI World, subsets of the index provide investors with the possibility to apply filters against certain sectors.

Key Facts

Number of components	313
Largest Component Weight	3.27%
Smallest Component Weight	0.01%
Top 10 Holdings Weight	14.20%
Top 50 Holdings Weight	53.13%

In Billion EUR

Total Market Capitalization	7'464
Free Float Market Cap.	6'743
Weighted Average Component Size	59
Median Component Size	10
Largest Component Size	221
Smallest Component Size	0.69

In Billion USD

Total Market Capitalization	11'330
Free Float Market Cap.	10'236
Weighted Average Component Size	89
Median Component Size	15
Largest Component Size	335
Smallest Component Size	1.0
